

mods::yaml::yaml_description_t

```
graph BT; A[mods::yaml::trap_description_t] --> B[mods::yaml::yaml_description_t]
```

The diagram illustrates an inheritance relationship between two C++ struct types. At the bottom is a gray-shaded box labeled 'mods::yaml::trap_description_t'. A blue arrow points vertically upwards from this box to a white box at the top labeled 'mods::yaml::yaml_description_t'. This indicates that 'trap_description_t' inherits from 'yaml_description_t'.
